## Industrial Wood Wax Finish

**Binding agents:** - based on the re-growing vegetable raw materials sunflower oil, soybean oil and thistle oil.

**Waxes:**

- based on the re-growing vegetable raw materials Carnauba wax and Candelilla wax
- paraffins which are obtained from the processing of petroleum and which are approved for the use in pharmacy and medicine (in compliance with purity demands of European Pharmacopoeia).

**Solvents:** - aliphatic hydrocarbons = disaromatized white spirit (benzenefree, in compliance with purity demands of European Pharmacopoeia).

**Earths:** - mineral origin, silicic acid and swelling clays

The used mineral earths have been purified from all poisonous ingredients (e.g. heavy metals) and are physiologically safe.

**Additives:**

- zinc-zirconium-cobalt-octoates (are obtained from the respective minerals and are leadfree)
- ketoximes
- polysiloxanes (on the basis of silicic acid)

The listed ingredients serve to a regular drying and the prevention of film formation (5 years storage stability) as well as a strong water repellency.

According to EG requirements Industrial Wood Wax Finish does not have to be marked and will not emit physiologically harmful compounds to environment.

Osmo Industrial Wood Wax Finish does not contain biocides nor preservatives. The dried finish is safe for man, animal and plant, and is in compliance with the German Industrial Norm DIN 53160 (fast to perspiration and saliva) and Euro Norm EN 71 (safety of children's toys). Test certificates are available.
