

January 2004

Full declaration of ingredients - in addition to product information

POLYX[®] Profi-HARDWAX-OIL High Solid

Binding agents: - based on the re-growing vegetable raw materials sunflower oil, soybean oil and thistle oil as well as natural resins.

Waxes: - based on the re-growing vegetable raw materials Carnauba wax and Candelilla wax
- paraffins which are obtained from the processing of petroleum and which are approved for the use in pharmacy and medicine (in compliance with purity demands of European Pharmacopoeia).

Solvents: - free of organic solvents and free of water
(solid content ≈ 99 % according to DIN EN ISO 3251).

Earths: - mineral origin, silicic acid and swelling clays

The used mineral earths have been purified from all poisonous ingredients (e.g. heavy metals) and are physiologically safe.

Additives: - zinc-zirconium-cobalt-octoates (are obtained from the respective minerals and are leadfree)
- ketoximes
- polysiloxanes (on the basis of silicic acid)

The listed ingredients serve to a regular drying and the prevention of film formation (2 years storage stability) as well as a strong water repellency.

According to EG requirements Osmo Polyx Profi-Hardwax-Oil does not have to be marked and will not emit physiologically harmful compounds to environment.

Osmo POLYX[®] Profi Hardwax-Oil does not contain biocides nor preservatives. The dried finish is safe for man, animal and plant, and is in compliance with the German Industrial Norm DIN 53160 (fast to perspiration and saliva) and Euro Norm EN 71 (safety of children's toys).

Further details concerning technical characteristics etc. can be obtained from the respective product information.

The above information is given to the best of our knowledge but without liability.
